CALLING ALL SHIPYARD AND DRY DOCK OPERATORS AND FLEET MAINTENANCE MANAGERS!

6, 7, 8 JUNE 2017, AMSTERDAM, THE NETHERLANDS

The boutique exhibition and conference dedicated to marine maintenance and repair tools, technologies and services

Nothing is more important for a vessel than it being operational and safe, and that means nothing is more important than maintenance and repair. **Marine Maintenance World Expo and Conference** is the boutique exhibition of marine maintenance technology providers, with technologies on show from hull-cleaning equipment and monitoring equipment, to general maintenance tools and software. In short, if you are responsible for the operational reliability, efficiency and safety of your fleet, or if you own a dry dock or repair yard and you need the latest maintenance tools and knowledge, this is the only exhibition and conference for you. Every single exhibit and conference paper is dedicated to marine maintenance and repair: literally the entire event is relevant to what you do.

Taking place at the
same time...
